

Torfichen Wind Farm

EIA Scoping Report – Appendix 5.1: Appraisal of Designated Heritage

Client: Renewable Energy Systems Ltd.
Project/Proposal No: 5585
Version: Final
Date: 2022-11-18

Appendix 5.1: Table 1 - Scheduled Monuments within 10 km of the proposed turbine locations

Designation Reference	Designation Title	Scheduled Monument Category	Turbines visible	Turbines visible with Screening	Distance from nearest Turbine (km)	Direction to nearest turbine	Appraisal Comments
SM5652	Newbyres Castle	Secular: castle	19	0	5.5	South	The asset is situated along a south-facing slope along the northern bank of Gore Water. The asset is now enclosed by domestic properties in the town of Gorebridge to the north, east, and west, and is bordered by the Borders Railway to the South. The setting of the asset provides a defensive positioning along the Gore Water, as well as views throughout the immediate landscape, which form part of the significance of the asset. The Proposed Development would be visible within views to the south, however, these views are greatly disrupted by the presence of the existing surrounding built environment of Gorebridge and the Borders Railway. As such, their presence would be a minor distraction within the current setting and the asset is Scoped Out of further assessment.
SM6260	Fort 500m SW of Loquhariot	Defensive	19	19	4.7	Southwest	The asset is situated on higher slopes to the north of Gore Water comprising archaeological remains. The setting of the asset comprises the slopes on which it would have control of the Gore Water and the valley, and a defensive position. The Proposed Development would not be visible with consideration of screening. As such, the lack of visibility with the proposed turbines, and the lack of impact upon the ability to understand, appreciate and experience, the asset is Scoped Out .
SM5976	Moorfoot Chapel, monastic	Ecclesiastical: monastic settlement	12	0	2.4	Northeast	Scoped In

	grange and chapel						
SM6264	Newbigging, enclosure 400m WNW of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	8	8.0	Southeast	<p>The assets are located within arable land and close to water sources such as the Shiel Burn. The setting of the assets forms part of their significance. The arable land was likely key for the placement of the assets, providing opportunities for the cultivation of crops and raising livestock. The placement of the assets on the high ground allows for wide-ranging views within the landscape and intervisibility between the assets, allowing for the easy defence of the land, particularly the watercourses that the assets sit along. Whilst long-range views of the asset are part of its setting, these long ranging views do not contribute to the assets significance. Whilst the proposed turbines will be visible from the assets, they do not impede the intervisibility between the assets and will not impede the views between the assets and the watercourses that they are defending. As such, they are not anticipated to impact the ability to understand, appreciate and experience the connection of the assets to their setting and have been Scoped Out of further assessment.</p>
SM6265	Newbigging, enclosure 400m NE of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	12	7.8	Southeast	
SM6257	Highwood House, enclosure 800m S of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	2	6.4	Southeast	
SM6230	Whitebog Farm, enclosure 450m SE of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	16	8.7	Southeast	

							experience the connection of the asset to its setting and the asset has been Scoped Out of further assessment
SM6258	Stonefieldhill Farm, henge 500m SE of	Prehistoric ritual and funerary: henge	10	11	6.1	Southeast	The setting of the asset comprises arable farmland, with wide-ranging views of the surrounding landscape due to its elevation above the surrounding land. The asset is close to several prehistoric enclosure settlements (e.g. SM6257), which may be contemporaneous to the asset. The asset has entrances at the northeast and southwest, which may have a celestial alignment, similar to Stonehenge. It is assumed that the alignment of these entrances is indicative of the main approach to the asset. The Proposed Development is anticipated to be peripheral to the views from these key approaches or impact any visibility between the asset and any potential contemporaneous assets. As such the Proposed Development would not be expected to impact the assets setting that contributes to its significance. It is Scoped Out of further assessment.
SM6259	Carrington Barns, enclosure 500m SE of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	0	5.1	South	The asset setting comprises arable farm land, on an eastern facing ridge overlooking the River South Esk to the east. The placement of the asset on the ridge allows for wide-ranging views within the landscape, allowing for easy defence of the River South Esk. Whilst all of the proposed turbines will be theoretically visible from the asset, these will be peripheral to the wide-ranging landscape views and are not anticipated to impact views along the River South Esk. As such, they are not anticipated to impact the ability to understand, appreciate and experience the connection of the asset to its setting and the asset has been Scoped Out of further assessment

iver	Loquhariot, fort 500m SW of	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	19	0	4.7	Southwest	Scoped In.
SM6339	Lawfield, enclosure 500m E of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	0	0	9.6	South	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM6262	Saughland, enclosure 1000m ESE of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	0	8.7	Southeast	The assets setting comprises arable farmland, along the banks of Cakemuir Burn, with views between the two enclosures being key. The placement of the assets allows for wide-ranging views within the landscape, allowing for command of the Cakemuir Burn. Whilst some of the proposed turbines will be visible from the assets, they will be peripheral to the views along the Cakemuir Burn to the east and west and will not impact the shared intervisibility of the assets. As such, they are not anticipated to impact the ability to understand, appreciate and experience the connection of the assets to their setting and have been Scoped Out of further assessment
SM6294	Frostineb, enclosure 600m E of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	3	0	8.6	Southeast	
SM6261	Saughland, enclosure 150m W of	Prehistoric ritual and funerary: cursus/bank barrow	1	0	8.0	Southwest	The asset setting comprises arable farmland, on a north-facing slope overlooking a valley between Harle Rigging and an unnamed hill. The placement of the asset allows for wide-ranging views throughout the landscape, especially to the north, allowing for easy defence of the valley which runs northeast to southwest. The majority of the Proposed Development is not anticipated to be visible from the asset, with the single visible turbine being a minor intrusion on the

							landscape. As such, the Proposed Development is not anticipated to impact the ability to understand, appreciate and experience the connection of the asset to its setting and the asset has been Scoped Out of further assessment.
SM6274	Longfaugh, enclosures 200m E of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	7	5	8.2	Southwest	The assets setting comprises arable farmland, on a high point within the local landscape. The placement of the asset on high ground allows for wide-ranging views throughout the landscape, allowing for easy defence of the valley to the south of Harle Rigging, as well as potential intervisibility with nearby contemporary assets (SM6261, SM1174) which also line the valley. Potential long-distance views of the turbines are predicted to be peripheral to any key views along the valley and will not impact the intervisibility between the nearby. The asset is therefore excluded (Scoped Out) from further assessment.
SM6273	Hope, enclosure 300m SSE of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	0	0	8.5	Southwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process..
SM6338	Lawfield Wood, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	16	16	9.7	South	The setting of the asset comprises a prominent ridge with main views to the north and west, surrounded to the west and south by several towns and villages including Mayfield and Gorebridge. The setting of the asset forms part of its significance, providing control over the landscape to the north and west and the ridge providing a natural defensive position. The Proposed Development would be visible in views to the south, however, these views are greatly disrupted by the presence of the existing surrounding built environment and the proposed turbines are not part of the key views to the north and west. As such, the Proposed

							Development would not provide any further impact on the ability to understand, appreciate, and experience the asset. It is Scoped Out of further assessment.
SM6336	Gowkshill, enclosure 150m E of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	15	7.3	South	The setting of the assets comprises rural farmland that slopes to the west, overlooking the River South Esk and its associated valley. The assets are currently bordered by the town of Gorebridge to the south and Newtongrange to the west. The placement of the assets on high ground allows for wide-ranging views throughout the landscape, particularly to the west. The positioning of the asset allows for command of the River South Esk valley, with the higher elevation providing a natural defensive position. The assets proximity is part of their significance, allowing intervisibility. Whilst the proposed turbines are predicted to be visible from the assets to the south, these long-range views are immediately disrupted by the built environment of Gorebridge and thus the turbines form only a minor distraction to the views along the River South Esk valley. As such, it is not anticipated that the Proposed Development will impact the ability to appreciate, understand, or experience the assets, their connection to their setting, and their intervisibility. It is Scoped Out of further assessment.
SM6337	Gowkshill, enclosure 300m SE of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	19	0	7.1	South	
SM6231	Play Hill, settlement	Prehistoric domestic and defensive: settlement	19	0	6.7	Southwest	The assets setting comprises west facing slopes, along the eastern bank of Tyne Water. The placement of the assets on higher ground provides long-ranging views in all directions, providing a defensive position along Tyne Water and potential intervisibility between each other and nearby contemporary assets. The positioning and distance of the proposed turbines from the assets mean that they are likely to be peripheral to the key views between the assets and along Tyne Water. The Proposed Development is not predicted to impact the ability to understand, appreciate, and
SM6272	Turniedykes, enclosure 150m NW of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	18	0	8.0	Southwest	

							experience the assets and as such, they are excluded (Scoped Out) from further assessment.
SM6239	Midfield House, settlement 200m ENE of	Prehistoric domestic and defensive: settlement	19	0	9.8	Southeast	The assets setting comprises the northeastern edge of a locally prominent ridge above the River North Esk to the northwest. The modern town of Bonnyrigg borders the asset to the north, with other modern towns and villages such as Rosewell and Gorebridge within the wider landscape. The positioning of the asset forms part of its significance, with the natural ridge providing control of the River North Esk valley and a natural defensive position. The Proposed Development would be visible in peripheral views to the southeast, however, the primary focus of the asset is to the northwest and these peripheral views are greatly disrupted by the presence of the existing surrounding built environment. As such, the Proposed Development would not provide any further impact on the ability to understand, appreciate, and experience the asset. It is Scoped Out of further assessment.
SM6333	St Mary's Chapel, chapel 250m ENE of Mount Lothian	Ecclesiastical: chapel	19	19	5.5	Southeast	The asset is located within agricultural fields, 300m to the northeast of the modern settlement of Mount Lothian. The chapel was once part of the parish of Penicuik, with the main town located 5 km to the northwest. The immediate rural setting of the asset contributes to its significance, as it enables the understanding of medieval ecclesiastical development within rural communities. Potential long-distance views of the turbines are not anticipated to impact this local setting of the asset and the assets are excluded (Scoped Out) from further assessment.
SM6335	Hardengreen, enclosure 300m WSW of	Prehistoric domestic and defensive: enclosure	19	4	9.9	South	The assets setting land to the north of Pittendreich Burn and to the east of River South Esk. The asset is surrounded by modern settlements, such as Bonnyrigg to the west and Newtongrange to the southeast. The positioning of the asset forms part of its significance,

		(domestic or defensive)					with the asset commanding the River South Esk valley to the east. The Proposed Development may be visible in views to the south, however, the main focus of the asset is along the valley to the east and these peripheral views are greatly disrupted by the presence of the existing surrounding built environment. As such, the Proposed Development would not provide any further impact on the ability to understand, appreciate, and experience the asset. It is Scoped Out of further assessment.
SM2774	Cavarra Hill, settlement	Prehistoric domestic and defensive: settlement	0	0	9.9	Northeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM2777	Dundreich, cairn	Prehistoric ritual and funerary: cairn (type uncertain)	19	19	6.2	Northeast	Scoped In.
SM3527	Jeffries Corse, cairn	Prehistoric ritual and funerary: cairn (type uncertain)	19	19	5.4	Northeast	
SM5653	Falla Luggie Tower, towerhouse	Secular: tower	19	1	7.5	Southwest	Scoped In.
SM5608	Hirendean Castle	Secular: castle	19	0	3.0	Northeast	Scoped In.
SM5063	Uttershill Castle	Secular: castle	0	0	9.8	Northwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.

SM5607	Old Woodhouselee Castle	Secular: castle	0	0	9.9	Northwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM7573	Soutra Aisle, part of site of medieval hospital	Ecclesiastical: hospital/hospice	19	19	9.9	East	Scoped In.
SM731	Northshield Rings, fort, The Camps	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	0	0	7.4	Northeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM1166	Corsehope Rings, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	18	15	5.0	Northwest	Scoped In.
SM2135	Roughsware, enclosure 500m S of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	0	0	3.8	West	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM1191	Temple, Old Parish Church	Ecclesiastical: church	0	0	4.4	Southeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM1169	Crichton Mains,	Prehistoric domestic and	18	0	7.6	Southwest	The asset setting comprises arable farmland on a gentle north-facing slope of Harle Rigging. The asset is

	souterrain 1280m E of	defensive: souterrain, earth-house					located close to the contemporaneous Longfaugh Fort (SM1174) and Pathhead Roman camp (SM5819). The assets setting within an Iron Age landscape forms part of its significance, as those using the Souterrain would have likely been also using the hillfort at the same time. Being mostly buried, the souterrain would not have been a distinct point in the landscape and as such, it is unlikely that intervisibility between the contemporaneous assets would have been important. However, it is not anticipated that the Proposed Development will impact the views between these assets and as such will not impact the ability to understand the connection between the asset and the Iron Age and Romano-British landscape in which it sits. It is Scoped Out of further assessment.
SM1174	Longfaugh Fort, Crichton	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	0	0	7.7	Southwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM1176	Middlehill, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	18	14	9.3	Northwest	The assets setting comprises a prominent southwest-facing ridge, overlooking the valley of Gala Water, with Toddleburn Wind Farm located to the north. The asset's setting forms part of its significance, as the positioning of the asset gives command of the valley as well as a natural defensive position. Whilst the turbines are predicted to be visible from the asset, their positioning and distance mean that they are likely to be peripheral to the key views along the valley to the southwest. As such, the Proposed Development is not predicted to impact the ability to understand, appreciate, and experience the asset. It is excluded (Scoped Out) from further assessment.

SM1170	Halltree Rings, settlement, Chapel Hill	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	10	9	5.6	West	Scoped In.
SM1167	Cortleferry, scooped settlement 400m NW of	Prehistoric domestic and defensive: scooped settlement	0	0	8.9	Northwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM1186	Cockpen, old parish church	Ecclesiastical: church	19	0	7.7	South	The asset's significance derives from its local historical interest as the Cockpen Parish church, providing the opportunity for further information about the society in the area from the 12 th Century onwards. The church would have had a strong connection to Dalhousie Castle (LB784), located 400m to the northwest, the owners of which held the patronage of the church. The Proposed Development is not anticipated to impact the ability to understand and appreciate the significance of the asset, and as such, it is Scoped Out of further assessment.
SM1164	Camp Wood, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	19	0	7.9	South	The asset's setting comprises a southeast-facing slope, overlooking Tyne Water to the east, with the asset currently contained within historic forestry. The asset's significance is in part formed by its setting, as it provides a command over the Tyne Water valley as well as a natural defensive position. Whilst some turbines may be visible, they are predicted to be peripheral to any key views along the river valley. As such, the Proposed Development is not anticipated to impact the ability to understand the connection of the asset with its setting. Thus, it is excluded (Scoped Out) from further assessment.

SM1171	Hodge Cairn, fort, Shank Wood	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	0	0	7.4	Northwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM3067	Soutra Aisle, burial aisle and part of site of medieval hospital	Ecclesiastical: hospital/hospice	19	19	9.9	East	Scoped In.
SM2731	Hillside Knowe, settlement, Glentress	Prehistoric domestic and defensive: settlement	0	0	9.8	North	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM3148	Woolandslee Tower	Secular: tower	0	0	8.2	North	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM1177	Nether Brotherstone, fort, Heriot	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	0	0	7.4	West	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
SM13585	Crichton Castle	Secular: castle	19	19	5.8	Northeast	Scoped In.
SM1208	Rosslyn Castle, Roslin	Secular: garden	0	0	9.7	Northwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.

SM5819	Pathhead, Roman camps, enclosures and pit alignment	Prehistoric domestic and defensive: pit alignment; Roman: camp	19	0	8.6	Southeast	<p>The asset's current setting comprises agricultural fields to the south of the village of Pathhead. The original setting of the asset comprised a prehistoric landscape, including iron age hillforts (SM1174) and prehistoric settlements (SM6273). Deere Street, the roman road which once ran from York to the Antonine Wall near Edinburgh, ran along the northeastern edge of the camp. Deere Street now forms part of the A68 which runs along the same route, which forms the key approach to and from the asset. Whilst the Proposed Development is anticipated to be visible from the asset, the distance from the turbines and orientation of the asset means that the turbines are predicted to be minor intrusions within the wider landscape and peripheral to any key views. As such, the Proposed Development is not anticipated to impact the ability to understand the connection of the asset with its setting. Thus, it is excluded (Scoped Out) from further assessment.</p>
SM2962	Dere Street, Roman road, Soutra Aisle to Turf Law	Roman: road	0-10	0	9.8	East	<p>The asset provides a clear routeway through the Lammermuir Hills, which form its setting. The asset runs from Soutra Aisle to the north, towards Turf Law in the south, utilising natural landform as well as turf constructions to provide an easy route through the landscape. Due to its utilisation of the natural landscape, the asset's setting forms a large part of its significance. The majority of the asset is not anticipated to provide views of the Proposed Development, especially in views along the length of the routeway. As such, any views of the Proposed Development from the asset are predicted to be peripheral and not impact the ability to understand the connection between the asset and its setting. It is Scoped Out of further assessment.</p>

SM6266	Capielaw, enclosed settlement	Prehistoric domestic and defensive: settlement	19	19	7.6	Southeast	<p>The assets setting comprises relatively flat arable land, directly to the north of a small burn. The asset is bordered by Whitehill House Golf Course to the east and north, with the village of Rosewell to the east.</p> <p>There are several prehistoric settlements within the wider landscape (e.g., SM6239, SM6257). The asset's setting forms part of its significance, with its placement within the landscape offering long range views and potential intervisibility with other nearby settlements.</p> <p>Whilst the turbines are predicted to be visible from the assets, their positioning and distance mean that they are likely to be peripheral to the key views between the nearby prehistoric assets.</p> <p>As such, the Proposed Development is not predicted to impact the ability to understand, appreciate, and experience the assets. They are excluded (Scoped Out) from further assessment.</p>
SM6825	Wallace's Cave, cave and rock carvings	Prehistoric ritual and funerary: cupmarks or cup-and-ring marks and similar rock art; Secular: cave	0	0	9.9	Northeast	<p>Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.</p>

Appendix 5.1: Table 1 – Category A Listed Buildings within 10km and Category B Listed Buildings within 5km of the proposed turbine locations

Designation Reference	Designation Title	Category	Turbines Visible	Turbines Visible with Screening	Distance from Nearest Turbine	Direction to nearest turbine	Appraisal Comments
LB687	Whitehill Policies, Whitehill House, Former St Joseph's Institution	A	4-15	0	8.0	Southeast	The asset comprises multiple buildings forming part of the country house estate, to the southeast of Rosewell, once regarded as one of the principal mansions in the parish. Although, the house and gardens have been replaced and altered in the 20 th century with additions of a chapel and rectory. It forms a part of a golf course in the present day with views taking in the course, dense woodlands and the Shiel Burn which make up its immediate setting. Views of the Proposed Development vary from limited to noticeable visibility although the windfarm would be visible only in the backdrop of views south-eastward. It is not anticipated that the Proposed Development would impact the understanding, appreciation and experience of the asset and its immediate setting. It is therefore Scoped Out of further assessment.
LB753	Crichton Kirk (Formerly Collegiate Church of S.S. Mary And Kentigern) Including Graveyard	A	19	0	6.3	Southwest	The asset comprises a restored 13 th Century church located toward the top of a steep westward slope. The asset draws part of its significance from its immediate setting, which comprises Crichton village to the immediate northeast, Crichton Castle to the Immediate south and related Manse to the Northwest. It is anticipated that turbines will be visible in southwards views, given the sites elevation, however these views will be long-distance. As such, the Proposed Development will be minor

							intrusions within long-distance views of the site would not impact the appreciation, experience and understanding of the church and its setting. It is therefore Scoped Out of further assessment.
LB756	Ford, Ford House and Walled Garden	A	8-9	0	9.1	Southwest	The assets are located along in the east of the village of Ford, along Tyne Water which runs to the west. The asset primarily draws its significance from its mostly preserved architecture. Whilst its immediate setting and connection to the village of Ford may contribute to the assets significance, the Proposed Development will only be visible in long-distance views to the south. As such, the proposed development will not impact intervisibility between Ford to the west and the asset to the east, and will be minor distractions within wider ranging landscape views. Therefore, it is not anticipated that the windfarm would impact the ability to understand, appreciate, or experience the asset and its connection to its setting. It is Scoped Out of further assessment.
LB5090	Lothian Bridge, Tyne Valley	A	0	0	9.4	Southwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB757	Crichton House, East and West Wings	A	0	0	8.0	Southwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB780	Cockpen And Carrington Parish Church, Including Gates, Gatepiers,	A	19	0	8.8	South	The assets primary setting is its churchyards, as well as the nearby towns of Bonnyrigg and Newtongrang, located to the east and west of the asset, for which it acted as a parish church.

	Boundary Wall and Letter Box						Whilst the Proposed Development will be visible to the south, intervisibility between the assets and the towns to the east and west will not be affected. It is not anticipated that the Proposed Development would impact the ability to understand, appreciate, or experience the asset and its connection to its setting it is therefore Scoped Out of the assessment.
LB784	Dalhousie Castle	A	19	0	8.0	South	The assets comprises a medieval castle with later post-medieval additions located along the River South Esk to the east. The assets takes its significance from its architecture and its setting along the river valley. The positioning along the river valley allowed command of the landscape along this north/south corridor. Whilst turbines are anticipated to be visible to the south from the asset, they are not anticipated to be visible from the river valley itself. Due to their distance, any views the proposed turbines are likely to be minor infringements within these long distance views. The Proposed Development is not anticipated to impact the ability to understand, experience and appreciate of the significance of the asset. It is therefore Scoped Out of the assessment.
LB799	Vogrie House	A	7	0	7.8	Southwest	The assets is a post-medieval baronial mansion stepped to the northeast taking in views of the secluded rural setting to the north, Tyne Water valley to the east and golf course to the south. Visibility of the Proposed Development is limited and it is not anticipated that the Proposed Development would be considered as part of the assets setting which draws its significance from the rural features and views mentioned. This immediate setting a testament to its usage as a country park in the late 20 th

							century. The Proposed Development would not impact an appreciation, experience and understanding of the asset with limited views appearing in the backdrop of its immediate setting. Therefore, it is Scoped Out of this assessment.
LB805	Borthwick Castle, Including Outer Walls and Gatehouse	A	4	0	4.1	South	The asset comprises a medieval castle and associated gatehouse and outer walls. The asset takes its setting from the Gore Way and its rural wooded setting along the river. Furthermore, the Castles relationship with Borthwick hamlet and its related historic buildings comprising the Church, Manse, listed cottages and Currie House and Gardens which make up the setting of the Castle. The keep and U plan layout of the Castle also attest to the assets architectural significance. Visibility of the Proposed Development is not anticipated with co-visibility very limited. The assets setting and architectural significance is not anticipated to be impacted by the Proposed Development as it is not considered as part of the assets setting within the hamlet. Therefore it is not expected to impact the experience, understanding and appreciation of the assets architecture and setting and it is therefore Scoped Out of this assessment.
LB806	Middleton Hall, Including Gatepiers, Gates, Ha-Ha and Boundary Walls	A	18	0	2.7	South	The assets comprise a post-medieval country house and associated buildings and garden features, including a walled garden. Visibility of the Proposed Development is anticipated although the asset draws its significance from its architecture, with a notable oak staircase and its setting from its enclosed estate and gardens, surrounded on all bounds by tree belts. The approach to the house is aligned
LB45181	Middleton Hall Walled Garden	B	18	0	2.6	South	

							east to west and connects to Middleton, a village of a large agricultural presence once a part of the estate, The asset lies within the parcel of trees surrounded by arable fields which make up its wider setting. Views of the wind farm 3km southwest are to be expected although the Proposed Development would not make up part of its setting Therefore, it is not expected to impact the experience, appreciation and an understanding of the asset they are Scoped Out of the assessment.
LB808	Arniston House, Including Stable Block, Outbuildings, Orangery, Ha-Ha And Sundial	A	19	19	4.2	South	Will be considered as part of the assessment of the Arniston Designed Landscape (GLD00029), which has been Scoped In .
LB811	Arniston Policies, Grotto	A	4	0	4.1	South	
LB814	Arniston Policies, North Lodge, And Lion And Elephant Gate, Including Gates And Gatepiers	A	19	0	5.4	South	
LB14625	Arniston Policies, Walled Garden, Including Gateways And Loggia	A	9	0	3.9	South	
LB810	Arniston Policies, Ornamental Pillar	B	19	0	4.0	South	
LB45144	Arniston Policies, Sunken Garden,	B	18	0	3.9	South	

	Rustic Bridge To West Over Purvies Hill Burn					
LB45145	Arniston Policies, Sunken Garden, Stone Bench	B	14	0	3.9	South
LB45147	Arniston Policies, Sunken Garden, Vehicular Bridge Over Purvies Hill Burn	B	13	0	3.8	South
LB45143	Arniston Policies, Sunken Garden, Rustic Bridge To East Over Purvies Hill Burn	B	13	0	3.8	South
LB45804	Arniston Policies, Arniston Gardens House Including Gatepiers	B	11	0	3.8	South
LB812	Arniston Policies, South (Cougar) Gate	B	13	0	3.7	South
LB809	Arniston Policies, Garden Urn	B	19	19	4.3	South
LB18977	Arniston Polices, West Lodge, Including Gatepiers And Boundary Walls	B	1	0	4.5	South
LB45130	Arniston Policies, Arniston Mains Farmhouse	B	19	0	4.6	South

	Including Gatepiers And Boundary Walls						
LB45133	Arniston Policies, East Lodge Including Railings And Piers	B	15	0	3.8	South	
LB45140	Arniston Policies, Rustic Bridge No 6 Over River South Esk	B	0	0	4.4	South	
LB45805	Arniston Policies, Horace's Bridge Over River South Esk	B	0	0	4.2	South	
LB2037	Portmore	A	0	0	8.3	Northeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB14604	Newtongrange, Lady Victoria Colliery	A	19	0	7.9	South	The asset is a colliery with strong links to the town of Newtongrange to its immediate north. The assets draws its significance from its industrial heritage and immediate colliery setting where long range views of the wind farm will not impact the immediate colliery setting, being a minor intrusion on the wider landscape. Therefore, the peripheral visibility of the Proposed Development is not anticipated to impact the experience, understanding and appreciation of the asset. It is therefore Scoped Out of the assessment.
LB14630	Rosebery House Policies, Home Farm	A	19	0	3.8	Southeast	The assets comprise a post-medieval farmstead and associated buildings including gates, chapel, and a lodge, which offer views

LB14629	Rosebery House Policies, Main Entrance Gatepiers	B	19	0	3.8	Southeast	over the rural landscape. Their immediate setting is vast woodland, plantations and reservoirs which are located to the north and south of Rosebery. The turbines would be visible from the assets, but they are anticipated to be peripheral to the keys views of the listed buildings and along the main road through Rosebery which contribute to its immediate setting. The Proposed Development would be a minor intrusion in the background of the assets and their setting and are not predicted to impact the ability to appreciate, experience or understand the significance of the assets. They are therefore Scoped Out of further assessment.
LB14628	Rosebery House Policies, Lodge	B	19	0	3.8	Southeast	
LB14627	Rosebery House Policies, Episcopal Chapel	B	19	0	3.6	Southeast	
LB13026	Roslyn Castle Excluding Scheduled Monument SM1208, Roslin	A	0	0	9.8	Southeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB13023	Hawthornden Castle, Including Gatepiers, Boundary Walls, Wellhead Drinking Fountainhead, Outbuilding And Caves, Roslin	A	0	0	9.9	Southeast	
LB686	Carrington Bridge, Over Redside Burn	B	0	0	4.5	South	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.

LB804	Borthwick Kirk (Church Of Scotland)	B	5	0	4.0	Southwest	The assets comprise a post-medieval church, with medieval inclusions, and houses with associated gatepiers, walls and outbuildings.
LB45150	Borthwick Manse, Including Gatepiers, Boundary Walls And Outbuildings	B	2	0	3.9	Southwest	They are located in the Borthwick and Crichton conservation area and will have very limited visibility with the turbines. The conservation area contributes greatly to the assets setting as do Borthwick Castle, Church, Manse, Currie Mains, Curie house and associated gardens and features. The church holds architectural significance designed with earlier included remains and it draws from its setting in the Borthwick estate and its relationship with local post-medieval houses. The setting along the Gore Water provides for a tranquil and rural aesthetic which contributes to the conservation area and surrounding views south-eastward are met by woodland and the presence of the windfarm may be limited to elevations of the turbines at few points from the assets. Views from the assets are focused more to the northwest over the fields and rural landscape. The significant views incorporate many features and buildings within the conservation area which make up the assets setting and the limited visibility with the turbines is not anticipated to impact the experience, understanding and appreciation of the assets. They will be Scoped Out of the assessment.
LB6363	Currie House, Including Gates, Gatepiers and Boundary Walls	B	10	0	4.3	Southwest	The asset comprises Currie house, a post-medieval building located in the Borthwick and Crichton conservation area. The house itself is expected to hold a medium level of visibility with the Proposed Development whereas its gardens and associated buildings are not. The Borthwick estate and conservation area add

							greatly to the assets setting amongst the Castle, Church, Manse and Currie mains in close locations to the asset. The assets setting located in the north-east of Borthwick also incorporates keys views along the main roads back towards the village as well as to the north overlooking arable fields and farmland. This setting is not expected to be impacted by the Proposed Development which may appear in the backdrop of views to the southwest. Its significance and relationship with assets in the conservations area is also not anticipated to be impacted by the Proposed Development and will not impact an understanding, appreciation and experience of the asset. It is therefore Scoped Out of the assessment.
As well as LB6364	Currie House, Walled Garden Including Sundial	B	0	0	4.2	Southwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB46172	Currie Mains, Including Ruined Cottage And Boundary Walls ,	B	0	0	4.0	Southwest	
LB6644	Esperston Farmhouse, Including Gatepiers	B	19	0	1.5	South	The asset comprises a post-medieval farmhouse and associated gatepiers. The asset is anticipated to have views of the Proposed Development, although its setting significance largely draws from its local agricultural setting on the western slope of Hurcheon Hill. The house is surrounded by woodland to the north, west and south although there are views of the Proposed Development to the southeast. The asset however draws its significance mainly from its social historic interest and agricultural relationships with Arniston. Therefore, the

							Proposed Development is not anticipated to impact the experience or appreciation of the asset and its connection to its setting. It is Scoped Out of this assessment.
LB13405	Heriot House Including Outhouses And Former Stables	B	1	0	4.7	West	The asset comprises a post-medieval former coaching house with associated outbuildings. The asset is anticipated to have a very minimal amount of visibility with the Proposed Development. Its setting comprises other local buildings of Heriot and the adjoining road networks and therefore the Proposed Development is not expected to impact the experience, understanding and appreciation of the asset. It is therefore Scoped Out of the assessment.
LB14619	Temple Village, Temple Kirk	B	0	0	4.4	South	Due to the assets falling outwith the ZTV, they are currently Scoped Out of further assessment. The assets will be monitored for potential impact throughout the design process.
LB14620	Temple Village, Temple Kirk Session House	B	0	0	4.4	South	
LB18192	Temple Village, The Mill House	B	0	0	4.5	South	
LB14633	Gladhouse, Gladhouse Villa	B	19	0	2.0	East	Scoped In.
LB45811	Gladhouse Reservoir Including Dam, Weirs, Revetments, Gangway, Measuring House, Tweeddaleburn Aqueduct And	B	19	19	2.0	East	

	Bridges Over Tributaries						
LB14632	Temple Village, Main Street, K6 Telephone Kiosk	B	12	0	4.1	South	<p>The assets comprise multiple post-medieval buildings, associated garden features and a K6 Telephone box which are all located in the village of Temple in the Temple and Arniston conservation area. The setting of the asset is to the lower lying land to the north of the village of Temple. Dense woodland lies to the west and the assets are located within the village and Temple and Arniston conservation area. The conservation area makes up for a significant part of the assets setting and as well as the relationship with the Church and Mill house to the villages north. The view southward will contain views of the wind farm although these look away from the conservation area. Key views look back in towards the village and to the assets to the north. Therefore, visibility of the Proposed Development is thought to be limited with views south-eastward disrupted by the built environment of Temple. It is not anticipated that the windfarm would have an impact on the appreciation, understanding and experiences of the assets. They are therefore Scoped Out of the assessment.</p>
LB14651	Temple Village 25-27 (Odd Nos) Main Street	B	15	0	4.1	South	
LB45821	Temple Village, 14 Main Street, Temple Cottage, Including Ancillary Structure, Garden Walls And Steps	B	12	0	4.1	South	
LB45156	Easter Middleton Farm House Including Gatepiers, Boundary Walls And Walled Garden	B	1	0	2.4	Southwest	<p>The asset comprises a post-medieval farmhouse and associated gatepiers, walls and gardens. The asset is located in Middleton, a rural and agricultural settlement. Its setting largely encompasses farms, agricultural buildings and farmland which intrude on views southward towards the proposed development. Intervisibility is thought to be limited due to this screening and the assets position on the northern downslope or Hurcheon Hill. The</p>

							Proposed Development is not anticipated to impact the experience or appreciation of the asset and would not impact its local agricultural setting, any long-range views of the Proposed Development will be peripheral and behind modern agricultural barns and buildings. Therefore, it is Scoped Out of this assessment.
LB45178	Harvieston Lodge, Gates, Gatepiers And Boundary Walls	B	19	0	4.7	South	The asset comprises a post-medieval lodge and associated gatepiers and walls. The lodge is located on the southwestern bound of Gorebridge and has historic associations with the Borthwick family. Its immediate setting is amongst the populated housing developments of Gorebridge and views over the fields to the southwest. Visibility of the proposed development is anticipated although it is not anticipated to impact the appreciation, experience and understanding of the asset, which draws its significance from its historical associations. Therefore, it is Scoped Out of this assessment.
LB45807	Braidwood Bridge Over River South Esk, B6372	B	0	0	4.3	South	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB45808	Braidwood Farm Including Gates, Gatepiers And Boundary Walls	B	19	0	4.5	Southeast	The asset comprises a post-medieval farmhouse and associated gatepiers and walls located on the western side of the Temple and Arniston Conservation area. The asset holds architectural significance as a traditional farmhouse of the period, within a mostly unaltered arable farmland setting. Intervisibility with the Proposed Development is largely anticipated in views to the southeast. The agricultural land in the area is located mores to

							the southwest and west which is incorporated in setting views away from the Proposed Development although may be visible from third points. An appreciation, understanding and experience of the assets is however no anticipated to be impacted by the Proposed Development as it does not makeup part of its arable setting. It is therefore Scoped Out of the assessment.
LB45809	Broadhead Cottage	B	19	0	2.8	Southeast	The asset comprises a post-medieval cottage located in Broadhead wood to the northwest of the Proposed Development. The asset is also located within the Temple and Arniston conservation area. Views from the cottage have visibility of the Proposed Development, especially if the assets immediate woodland would be removed. The woodland however makes up a significant part of the assets setting and for a tranquil and peaceful cottage location. The approach to the cottage is on a west to east alignment which looks towards the Rosebery reservoir and its rural setting to the east. This would provide for a key view from the asset although views back towards the asset would incorporate views of the turbines in the backdrop. Nevertheless, the Proposed Development is therefore not thought to impact an understanding, experience and appreciation of the asset and its immediate woodland setting, in the backdrop of views south-eastward. It is therefore Scoped Out of the assessment.
LB45814	Mauldslie Farmhouse And Steading	B	19	0	1.4	West	Scoped In.

LB45817	Outerston Farm, Cartshed And Granary	B	19	0	2.2	South	The asset comprises a post-medieval farm and associated outbuildings. The buildings have architectural significance as a traditional farmhouse of the period. It shares its setting with other farmhouses in the area, such as Esperston Farmhouse, which is the rural farmland and open fields that surrounds the asset. The Proposed Development would be visible from the asset to the south, beyond the immediate setting of the rural fields surrounding the asset. The Proposed Development would not impact in appreciating, understanding or experiencing the asset as it will not impact on intervisibility between the asset, its immediate setting, and other contemporary assets in the area, or impact our ability to appreciate the architectural significance of the building within its contemporary landscape. It is therefore Scoped Out of the assessment.
LB45819	Rosebery Reservoir Including Dam, Overflow, Upstand Shaft And Bridge	B	0	0	3.0	Southeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB45827	Toxside Farmhouse Including Ancillary Structures, Gates, Gatepiers And Boundary Walls	B	11	0	4.0	East	The asset comprises a post-medieval farmhouse and associated outbuildings and structures. The agricultural backdrop of the farmstead, with key views looking northward and westward, make up its setting. Visibility of the Proposed Development is limited and it is likely the turbines will appear in the peripheral backdrop of views eastward. The Proposed Development is not thought to impact an understanding, experience and appreciation of

							the asset and it is therefore Scoped Out of this assessment.
LB46088	Edgelaw Reservoir, Including Dam, Overflow, Upstand Shaft And Bridges	B	0	0	4.3	Southeast	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.
LB46172	Currie Mains, Including Ruined Cottage And Boundary Walls	B	0	0	4.0	Southwest	Due to the asset falling outwith the ZTV, it is currently Scoped Out of further assessment. The asset will be monitored for potential impact throughout the design process.

Appendix 5.1: Table 3 - Inventoried Gardens and Designed Landscapes within 10km of the proposed turbine locations

Designation Reference	Designation Title of Gardens and Designed Landscapes	Turbines Visible	Turbines Visible with Screening	Distance to Proposed Development	Direction to nearest turbine	Appraisal Comments
GDL00295	Newbattle Abbey	0-19 (Variable)	0-19 – Mostly 0, with a small area with 19 theoretically visible turbines.	8.9km	South	The asset is located 1 km southwest of the centre of the town of Dalkeith, with the abbey itself on the valley floor along the west bank of the River South Esk. Several tributaries for the River South Esk run through the parkland. A large portion of the designed landscape is now occupied by modern buildings, as well as a golf course. The landscape of the designed landscape is formed of gently undulating slopes which obscure any wider views outside of the immediate landscape from the Abbey. The key approach to the Abbey is along the Great Avenue, which leads towards the southwest from the mansion. This is the only angle that allows a wide-ranging view from the Abbey, and due to its orientation it will not be impacted by views of the proposed development. Any views over the designed landscape from higher ground (e.g., from the Kirk Bank walk) are already impacted by the presence of newer built environment, and as such any views of the turbines will be minor intrusions within the landscape. As such, it is predicted that the Proposed Development will not impact the ability to understand, appreciate or experience the heritage asset. The asset is Scoped Out of further assessment.
GDL00307	Oxenfoord Castle	0-19 (Variable)	0 – 2 – Mostly 0, with a minor area with	9.4km	Southwest	The designed landscape comprises the land surrounding Oxenfoord Castle, which sits on the western bank of the River Tyne. The castle itself sits above the river to the west, with open views towards the estate of Prestonhall to the east, whose parkland

			potentially up to 2 turbines visible.			is highly significant in the design of the designed landscape. The designed landscape extends to the north, where the land is agricultural and relatively flat, and to the south, where it begins to slope gently to meet the Moorfoot and Lammermuir Hills. The designed landscape includes two key historic approaches, the south and north drive, which are now mainly used for farm access, as well as the more modern approach from the west. As stated in the designation, views out from the asset are mainly limited to those towards Prestonhall in the northwest. As such, it is anticipated that the Proposed Development will be a minor intrusion in any views from the asset, and will not impact the views from the key drives and the castle over the Prestonhall estate. It is Scoped Out of further assessment.
GDL00327	Roslin Glen And Hawthornden Castle	0-7	0	9.5km	Southeast	Roslin Glen comprises the gorge along the River North Esk, populated with ancient woodland. From the 15 th century, the glen was populated with walks along the gorge centring on Rosslyn Chapel, Rosslyn Castle, and Hawthornden Castle. The key path through the glen follows the path of the river, with the topography of the gorge screening out any outwards views. The key approach to Hawthornden Castle within the designed landscape is from the east, with views to and from the asset along this approach not anticipated to be impacted by views of the Proposed Development. The key approach to Rosslyn Castle is to the north from the direction of Rosslyn Chapel. Whilst the Proposed Development may be visible along parts of this key approach, the distance from the Proposed Development and screening in the form of the ancient woodland is anticipated to ensure that the Proposed Development is a minor intrusion on the landscape and will not impact the significance of

						the designed landscape. It is Scoped Out of further assessment.
GDL00029	Arniston	0-19	0 - 19	3.8km	South	Scoped In.
GDL00311	Penicuik	0-14	0-19	9.8km	Southwest	Penicuik House and its associated designed landscape are situated along the north and south banks of the River North Esk, on the eastern edge of the Pentland Hills. Several tributaries and their associated valleys run through the landscape, forming part of the larger valley that divides the landscape in two. The views of the Pentland and Moorfoot hills, the River North Esk, the ponds and water features within the valley, the parkland itself, and the woodland all contribute to the significance of the asset. Views along and from within the river valley are not anticipated to be impacted by the Proposed Development, as it is screened from view by the topography. Whilst views across the parkland, especially from the uplands to the north and south, may include the Proposed Development, the distance from the site means that any views will be peripheral. Views of the Pentland Hills are not anticipated to be impacted and views of the Moorfoot Hills are anticipated to contain peripheral views of the Proposed Development. As such, it is anticipated that the Proposed Development will not impact the ability to understand, appreciate, and experience the significance of the garden and designed landscape. It is Scoped Out of further assessment.
GDL00318	Portmore	0-14, Turbines only visible at northernmost edge of the	0	6.5km	Northeast	The Portmore designed landscape is located within an upland valley to the east of Eddleston Water. The asset is bounded by the Moorfoot Hills to the east and southeast. The approach to the asset is from the A703 at the southwest, heading east through a wooded valley before turning north towards the main house (LB2037). Multiple tracks run through the

		designed landscape.				landscape, providing access to scenic views across the local landscape, woodland, and Portmore Reservoir. Views outwards from the asset towards the Proposed Development are screened by the Moorfoot Hills, so it is not anticipated that the turbines will be visible. As such, the Proposed Development is not anticipated to impact the ability to appreciate, experience or understand the significance and setting of the designed landscape. It is Scoped Out of further assessment.
--	--	---------------------	--	--	--	--

Appendix 5.1: Table 4 - Inventoried Battlefields within 10km of the proposed turbine locations

Designation Reference	Designation Title of Registered Battlefields	Turbines Visible	Turbines Visible with Screening	Distance to Proposed Development	Direction to nearest turbine	Appraisal Comments
BTL37	Battle of Roslin	0-19	0-19 (Although designated area is 0, some key areas of the battlefield are within higher areas)	9.9	Southeast	The Battle of Roslin (1303), derives its significance in part as one of the largest battles of the First Scottish War of Independence. The smaller Scottish force, approaching from the southwest, led a surprise attack on English forces encamped in the fields around Roslin, eventually routing them from the field. The landscape today remains predominately agricultural, and place names such as the Kill Burn show a continued connection between the area and the battle. The Proposed Development would form peripheral views to the southeast of the battlefield, and would not impact on the ability to understand the movement and positioning of the two armies and the key points of action of the battle within the rural landscape, or distract from any intervisibility between key points of the battle such as the Kill Burn or Hewan Bog. As such, the asset has been Scoped Out of further assessment.

Appendix 5.1: Table 5 – Conservation Areas within 5km of the proposed turbine locations

Reference	Title of Conservation Areas	Turbines Visible	Turbines Visible with Screening	Distance to Proposed Development	Direction	Appraisal Comments
CA339	Carrington	0-14	19	5km	South	Carrington Conservation Area comprises the village of Carrington and the surrounding agricultural fields. Whilst the village itself dates from as early as the 12 th Century, standing buildings, including the village church, date from the early 1700s. A large amount of the cottages in the village were constructed in the early 1800s to provide housing for those working at Carrington Mains farm. Several commercial enterprises grew around the cottages, including a school. The village also contains several bungalows constructed in 1938. The village has maintained its character, through the preservation of its period architecture, and it is from this that the conservation derives its significance. The Proposed Development has the potential to be visible in views to the south, however, the distance of the Proposed Development from the conservation area means that it is anticipated to be a minor intrusion on the landscape. It is not predicted to impact the character of the conservation area and as such will not impact its significance. It is Scoped Out of further assessment.
CA342	Temple & Arniston	0-19 (Variable)	0-19 – Mostly 0,	3.5km	South	Scoped In.

			with some visibility within the northeast and southwest.			
CA343	Borthwick & Crichton	0 – 19 (Variable)	0-19 – Mostly 0 with visibility in the northwest and some patches in the south.	2.8km	South	Scoped In.

ITPenergised is a leading, international consultancy offering renewable energy, natural resources, environmental, engineering, technical advisory and asset management services for clients with onshore and offshore projects.
